

Sadara – Industrial Plant

LOCATION: Jubail Industrial City II, Saudi Arabia

SYSTEM/TECHNOLOGY: AC800M / 800xA

SERVICES: Commissioning

INDUSTRY BRANCH/TYPE OF PLANT: , Large Plants, Chemical plants

CLIENT: ABB Saudi Arabia

Project description

The Sadara project is a world scale chemical site being constructed in Jubail Industrial City in Saudi Arabia. Construction work on the project has already started and is scheduled to be completed in 2015. Production from the first units is expected to begin in the second half of 2015, all units are due to be running by 2016. The fully integrated complex is planned to consist of 26 chemical manufacturing units and to be one of the largest of its kind in the world. Sadara will produce polyurethanes, propylene oxide, propylene glycol, elastomes, linear lowdensity polyethylene, low density polyethylene, glycol ethers and amines.
