engineering & services

## Your career at INP

We take responsibility for **people,**  
**technology and projects**

# We are

INP is an owner-managed engineering company with over 35 years of experience and more than 700 employees worldwide. We realize pioneering projects in the energy industry, in power plant and large-scale plant construction. We accompany our projects with passion and expertise from the initial concept idea through to successful commissioning.

## Our Vision

**is a sustainable and secure energy supply for us humans.**

Our extensive expertise, which we have continuously expanded, provides us with a stable basis for healthy, sustainable and organic growth. Every day, all INP employees contribute to shaping the energy transformation for future generations.

## We look for

### Experienced professionals

For all those who have already gained valuable experience in their profession: We offer you the opportunity to contribute your expertise and take on exciting new challenges.

### Young Professionals

For anyone with two to three years of professional experience and initial specialist knowledge: With us, you can make full use of your ideas and creativity and take advantage of our diverse career opportunities.

### Career starters

For anyone who has just completed their training or studies and would like to work in the field of electrical, mechanical or control technology or in the construction and infrastructure sector: We offer global projects and numerous further training opportunities.

# Design with us the future of energy!

Regardless of whether you want to start your career with us as a graduate or as an experienced professional - with us you will find a future-proof job and interesting new challenges in an international company.
